**Subject:** New Larvicide Due for Next Season

From the Schoolbugs listserv at the University of Florida, 9/5/02

See the link for this at http://extlab7.entnem.ufl.edu/PestAlert/arbovirus/uf_larvicide.htm

---

Researchers at the University of Florida developed a new mosquito larvicide that should be on the market next mosquito season. The larvicide uses a hormone that prevents mosquito larvae from digesting food.

Details are posted on the Florida Pest Alert site.

The Florida Pest Alert WWW site is available at
