Subject: Question from Hawaii: Fogging for mosquitos

I request that Mosquito Control agencies in New Jersey extend professional courtesy from the Garden State and respond to Gerry on his question. Thanks.
Pat

I happen to be from one of the few, if not the only state without a confirmed case of West Nile. However, our vector control people are getting their arsenal ready. In reviewing the labels of the various adulticides, I find that all have prohibitions against application over edible crops, forage and pasture. How did you deal with this?
