Subject: Revised cumulative risk assessment for the organophosphorous (OP) pesticides

Comments Sought:

EPA has announced the availability(@ <http://www.epa.gov/pesticides/cumulative/rra-op>) of the revisions to the cumulative risk assessment for the organophosphorous (OP) pesticides, which was developed as part of EPA's process for tolerance reassessments under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). They seek comments on or before July 22, 2002.

EPA provides that they have evaluated over 1,000 OP pesticide tolerances and virtually all of them are now consistent with the highest levels of safety (please note that EPA is still evaluating the tolerances for a few of the OP pesticides).
