Subject: Recently released minor use website and report from EPA

Posting to NJINPASCROPPROFILES@aesop.rutgers.edu

Please be advised that you are receiving this email as one of the people preparing a crop profile(s) for a New Jersey commodity. This is a closed listserv meant for your use exclusively to discuss and inform other 'crop profilers' of resources/issues you encounter during the process of developing your crop profile(s). Please maintain the listserv address for future use. Feel free to post directly to the listserv from your own email address. I'm sure that the other 'crop profilers' will appreciate your insight.

EPA recently posted a **website** (<http://www.epa.gov/pesticides/minoruse/>) and **report** (http://www.epa.gov/pesticides/minoruse/minor_use_rpt.pdf) on **minor uses of pesticides** that may be a useful resource to you in preparing crop profile(s).

Appendix 1 of the report provides a summary of recently registered pesticides for minor uses. Other EPA and IR-4 resources may be a more direct option when searching for registrations. But, this is distinct and useful in that it provides a context for registration for specific minor uses.

Thank you . Please don't hesitate to call if you need any assistance.

Pat
